Hugh Cayless & Natasha Smith

Goals:

1. Develop and refine methods for producing vector tracings of manuscript text
2. Produce a prototype web application illustrating these techniques
3. Explore the theory of text-image linking

[89]
[August 14, 1841]

It is now Saturday & nearly ten o'clock at night.

I have passed the day in idleness & to carry out the old proverb. "That Satan always finds some evil still, For idle hands to do"(112) == have just crowned the day, by quaffing once more a draught from the poisoned chalice of Bacchus & now sit down to record the events of the week. It has passed away, like the morning cloud & the early dew, & there is reason to fear that much of the time was misimproved by me. What have I done worthy to be recorded in this book? Alas! Nothing. On Thursday Fetter rushed me(113) shamefully. I was not expecting to be taken up & had been talking & laughing nearly the whole hour. He called on me to recite purely for revenge & so unexpected was the summons, that I became confused & made a failure, although I had prepared the lesson with as much care as usual. During the week I finished the "Divina Commedia" of Dante. It is a theological poem & entirely too deep for my comprehension. He was a native of Florence & the friend of Petrarch & Boccaccio. I wrote to Laura on Tuesday, it being the first time that I have written home this session.

The committee of which I was one appointed by society, to write to Mr Haywood, received a reply from that gentleman on Friday, declining to have his address published.(114)

toolset:

- XML (TEI, SVG, XSLT)
- Javascript (OpenLayers, JQuery)
- Apache, Tomcat, PHP, Djatoka image server
- Potrace, Inkscape, Imagemagick
